Scaling Climate Education in Zimbabwe

Edson Dongo
Teacher (Primary School), Teach For Zimbabwe
(a member of the Teach For All network)
Local impacts of climate change in Chiredzi District (Southern Zimbabwe)

Droughts (leading to water and food shortages)

Violent storms (leading to destruction)
Students learn about climate change in the classroom

School Club “Learners in the Fight Against Climate Change”

Practical climate action: Tree protection with recycled bottles
Whole school approach to sustainability teaching and learning

Students learn to maintain the solar energy system’s battery storage

School solar energy system

Computer lab powered by solar energy

School garden uses a solar-powered pump
Teach For Zimbabwe teacher training on climate education

Moving from some to many climate educators in national schools...
